

COVERS ALL YOUR NEEDS

AGRICULTURE-GRAINS

- Temporary storage
- Batching
- Long-term storage

Available across the whole Shelterall® range from 8 to 25 m widths and up to 15 m in height assembled on walls.

SHELTERALL® GRAINS

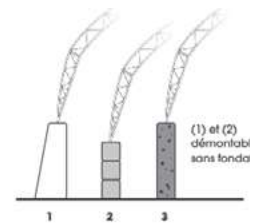

SHELTERALL® is a **cost-effective and sustainable solution** compared to traditional buildings. Since it can be dismantled, and is modular and without foundations, it provides short-, medium- and long-term storage possibilities in **ideal preservation conditions**.

The partitioning with mobile walls makes it easier to **create batches**. The facility with which stored materials can be unloaded and reloaded allows for a **high rotation capacity**.

Its galvanised steel structure meets the Eurocode building requirements. Its design and manufacture have received SOCOTEC inspection agency approval. Its coated and fireproof canvas covering is guaranteed for 10 years*. Its one-piece design provides maximum sealing.

Various possibilities for assembly on walls:

- 1: steel partitions
- 2: walls (concrete blocks)
- 3: poured concrete walls

1 and 2 are removable and without foundations

* See General Terms and Conditions

BENEFITS

Suitable height for unloading

Maximum sealing
